PROFESSIONAL SUMMARY

Security Engineer and problem solver with experience across SOC, cloud, VAPT, AppSec, DevSecOps and security automation. Skilled in incident triage, secure code analysis, cloud hardening Azure and M365. Built and deployed production-ready security systems and Agentic AI automation using Python, Docker, and CI/CD controls, with additional exposure to webapp security and threat intel.

CORE SKILLS

Security Automation & AI: Python automation, MCP, Playwright, Chrome DevTools, NVIDIA NIM, Ollama, vLLM, local and cloud LLM integrations

Application & Offensive Security: VAPT, agentic pentesting, web and mobile app security, secure code review (SAST, secrets, IaC scanning), vulnerability management, IoT security, reverse engineering, CTF challenge design

Security Operations: SIEM & log analysis, incident response and triage, threat hunting, malware analysis, digital forensics

Programming & Scripting: Python, Bash, PowerShell, C, JavaScript, Node.js, SQL, Git

Cloud, Infrastructure & Tools: Azure, Microsoft 365 / Entra ID, AWS, Cloudflare (WAF, Zero Trust), Linux, Docker, Kubernetes, CI/CD, Splunk, Burp Suite, Nmap, Nessus, Nuclei, Semgrep, Wireshark, Volatility, IoT & SBC Development

PROFESSIONAL EXPERIENCE

Security Systems & Automation Engineer
May 2026 – Aug 2026

Honest Cyber, Bengaluru

- Built and deployed a 3-2-1-1-0 ransomware-resistant backup platform for M365, Notion and Cloudflare on Azure, now running in production.
- Implemented hardening, IAM controls, and Zero Trust policies across Cloudflare, Entra ID, Azure, Ubuntu and other enterprise infrastructure.
- Built automation and GRC tools based on SMB1001 and ISO 27001 improving compliance evidence collection, retention tracking and risk visibility.

SOC Analyst
Jul 2025 – Dec 2025

Network Techlab India, Mumbai

- Monitored network and endpoint security events across SIEM platforms for 20+ national and international clients.
- Wrote Python scripts for log analysis, IOC, VirusTotal lookups, and sandbox malware analysis, automating repetitive manual workflows.
- Detected suspicious behavior within the client network, escalated as first responder, and contained the affected host.

Digital Forensic Intern
Nov 2024 – Jan 2025

K Cyber, Jaipur

- Assisted law enforcement officers during raids, identified, collected, and correlated digital evidence across seized devices for investigations.

KEY PROJECTS

HonestBackup — Encrypted SaaS Backup & Retention Platform
Python, Azure, Docker · 2026

- Collects Microsoft 365 (audit, sign-in and Defender logs, mail, SharePoint), Cloudflare and Notion into age-encrypted, SHA-256 verified archives, closing the gap between Microsoft's 180-day log retention and multi-year compliance needs.
- Incremental collection via Graph delta tokens reduced routine transfer from approximately 80 MB to 5 MB; an encrypted credential store and ledger verify that expected cloud archives exist.

SusCheck — Pre-Execution Gate
Python, CI/CD, Threat Intel · Jan 2026

- Built a pre-execution security pipeline integrating Semgrep, Bandit, Checkov and Gitleaks with VirusTotal and AbuseIPDB to automate code, infrastructure, secret and threat-intelligence checks before deployment.
- Correlates findings through AI-driven triage into a real-time Risk Index, so reviewers act on a single prioritized verdict rather than five reports.

Celestial — Agentic AI Browser Automation Extension
JavaScript, Chrome Manifest V3, LLM APIs · 2026

- Built a privacy-first browser agent that runs on local (Ollama, vLLM) or cloud (OpenAI, Anthropic, NVIDIA NIM) models.
- Automates DOM traversal, multi-tab execution, and workflow orchestration using Chrome Debugger and Scripting APIs.
- Treats web pages as untrusted input: client-side credential storage, CSP sandboxing and controlled routing to custom endpoints.

Additional open-source tools, CTF frameworks, security utilities and personal projects are at github.com/5h1Vm.

EDUCATION

B.Tech–M.Tech (Integrated), Computer Science Engineering (Cyber Security)
Jul 2022 – May 2027

National Forensic Sciences University (Ministry of Home Affairs, Government of India), New Delhi | **CGPA: 8.5**

CERTIFICATIONS

- AWS Certified Cloud Practitioner — 2025
- EC-Council — Certified Ethical Hacker AI (C|EH v13), *in progress* — 2026

ACHIEVEMENTS & ENGAGEMENT

- **Awards:** First Prize — Next Gen AI Ventures (LSR, DU, 2025); First Prize — All India Forensic Science Hackathon 2025 (INR 2 lakh seed funding); First Prize — Pitch Fusion, Entrepreneur Summit (NFSU, 2024); Third Prize — Hack-A-Thon (IMS UC, 2024).
- **Conferences & Events:** Speaker, Soldering Village (DEF CON Delhi 0x07; BSides Dehradun 0x02); Speaker, CTF 101; Community Volunteer, BSides Dehradun.
- **Leadership & Outreach:** Organizer, Cyber Security Awareness Month (2024), multiple national CTFs and other national-level tech events.
- **Technical Engagement:** Active CTF player with multiple podium finishes; CTF challenge developer at Razzify; hands-on IoT and SBC work.
- **Policy & Research:** Paper presentation at FINCON 2025; studied Technology and Public Policy at Takshashila Institution.
